

AI Suite Project - Instructions & README

Project Overview: This project is a simple AI Suite built using Streamlit. It includes features like a chatbot, data viewer, translator, and basic utilities.

Requirements: Install the following Python libraries before running the project: - streamlit - pandas

Installation Steps: 1. Install Python (if not already installed) 2. Open terminal or command prompt 3. Install required libraries using: `pip install streamlit pandas`

How to Run the Project: 1. Open terminal in project folder 2. Run the command: `streamlit run main.py` 3. The app will open in your browser automatically

Project Structure: - `main.py` : Main application file - `pages/` : Contains different feature modules - `README.pdf` : Instructions file

Features: - Chatbot (basic keyword-based) - Data Viewer - Translator - Simple Math Solver

Notes: - This project runs locally - Internet connection is not required for basic features - Some features are simplified for demonstration purposes
